

EFFORTS OF SWAMI SANT DASS PUBLIC SCHOOL IN ENVIRONMENT EDUCATION

“We have not inherited this Earth from our ancestors but borrowed it from our children”

In our efforts to create awareness about environment education our school has an Eco Club which focusses whole heartedly on making the students aware about the need to save our environment. In the past year also students have been engaged in various activities to promote this message.

Stage Activities like plays and speeches have been performed during the morning assembly to make them realize the importance of planting trees to save our planet Earth. Students are encouraged to keep their surroundings and classrooms clean and are appreciated for their efforts. Individual activities like poster making encourage the students to think about the environmental issues in a creative manner through art and writing catchy slogans. Various classroom activities in which students recycle and re use products help them to learn about ecofriendly ways in which to contribute towards environmental consciousness. Students participate in Earth Day and pledge their support towards environmental awareness and protection through various engaging activities. On World Environment Day also our students promote the message to improve the Earth's environment and to improve its condition. In this way little efforts by the institution will hopefully motivate our students to walk the path of awakening to save our environment.
