Properties of addition

(only for understanding)

Property 1: Two or more numbers can be added in any order, the sum will be same.

e.g.

$$25 + 4 = 29$$

or

$$4 + 25 = 29$$

and.

$$12 + 7 + 5 = 24$$

or

$$7 + 5 + 12 = 24$$

$$12 + 5 + 7 = 24$$

We can add the three numbers in 6 different ways but sum remains the same.

Property 2: The numbers can be grouped in any order, the sum will remain same in all the cases.

Property 3: When 0 is added to a number, the sum is the number itself.

$$\begin{aligned} \text{e.g. } 45 + 0 &= 45 \\ 189 + 0 &= 189 \end{aligned}$$
