ASSIGNMENT No. 1

Lesson-1

Using the Keyboard

INTRODUCTION

Every electronic gadget has keyboard for typing.

The computer also has different types of keys which are placed on the keyboard. The keyboard is one of the main parts of the computer.

A keyboard has small buttons which are called keys. There are usually 104 keys on the keyboard. The keys of the keyboard are used to type letters, words or sentences on the computer screen.

Every keyboard has some special keys which are used for different purpose.

Let's learn about these keys:

1) Alphabet keys

The Alphabet keys are used to type letters.

There are 26 alphabet keys on the keyboard.

2) Number keys

The number keys are used to type numbers.

They are marked with numbers 1-9.
