Ex 5 d

Q7

The distance between two bus stops is 75 km. A bus covers 25 km in one hour. What fraction of the distance has been covered? What fraction has to be covered.

Solution:

Total distance = 75 km.

Distance covered = 25 km

Fraction of distance covered = $\frac{25}{75}$

$$= \frac{25^1}{75^3}$$

Fraction of distance covered = $\frac{1}{3}$

Distance has to be covered = $75 - 25$
= 50 km

Fraction of distance to be covered = $\frac{50}{75}$

$$= \frac{50 \div 25}{75 \div 25}$$

Fraction of distance to be covered = $\frac{2}{3}$

Q9

Forty divided by half minus forty. What is the answer?

$$40 \div \frac{1}{2} - 40$$

$$= 40 \times \frac{2}{1} - 40$$

$$= 80 - 40$$

$$= 40 \text{ Ans.}$$
