Sub: SCIENCE

Lesson-2

Digestion and role of microbes

Microbes

Microbes are microscopic organisms. Millions of microbes exist. They can be unicellular or multicellular

Microbes may be:

- Bacteria
- Fungi
- Protozoa
- Viruses

Microbes are useful as

- ◆ Some of them used in bakery and Beverage industry for fermentation
- ◆ They help in conversion of milk into Curd
- ◆ Microbes act as Decomposers and help in maintaining flow of nutrients
- ◆ There are microbes which help in proper functioning of our body systems like brain, digestive system and immune system
- ◆ Microbes are used in sewage treatment plants.
- ◆ They are used in making antibiotics and medicines.
- ◆ Some microbes live in Digestive tract of Plant eating animals and help in digestion of food.

Some microbes are also Harmful for us as:

- ✚ Viruses cause infection to both plants and animals.
- ✚ Certain types of algae grow in water bodies and cause pollution.
- ✚ Fungi form molds on food products and spoil them.
- ✚ Some Bacteria spread communicable diseases like cholera and typhoid
- ✚ Protozoans also cause several diseases in human beings
